Performance

Opportunities — These suggestions can help your page load faster. They don't <u>directly affect</u> the Performance score.

Opportunity	Estimated Savings
▲ Enable text compression	3.3 s 💉
▲ Preload key requests	2.7 s 💙
▲ Serve images in next-gen formats	2.4 s 💉
▲ Remove unused JavaScript	1.95 s 🗸
▲ Eliminate render-blocking resources	1.43 s 💉
▲ Properly size images	1.05 s 😺
▲ Minify JavaScript	1.05 s 🗸
▲ Remove unused CSS	1.05 s 🗸

Efficiently encode images	0.3 s	~
Minify CSS	0.15 s	~

Diagnostics — More information about the performance of your application. These numbers don't <u>directly affect</u> the Performance score.

▲ Ensure text remains visible during webfont load	
▲ Does not use HTTP/2 for all of its resources — 25 requests not served via HTTP/2	
▲ Avoid enormous network payloads — Total size was 4,589 KB	
Avoid chaining critical requests — 9 chains found	
Keep request counts low and transfer sizes small — 25 requests • 4,589 KB	
Largest Contentful Paint element — 1 element found	
Avoid large layout shifts — 5 elements found	

Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

Contrast — These are opportunities to improve the legibility of your content.

▲ Background and foreground colors do not have a sufficient contrast ratio.

Internationalization and localization — These are opportunities to improve the interpretation of your content by users in different locales.

▲ element does not have a valid value for its [lang] attribute.

Names and labels — These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

▲ Links do not have a discernible name

Additional items to manually check (10) — These items address areas which an automated testing tool cannot cover. Learn version our guide on conducting an accessibility review.

Passed audits (11)

Best Practices

Trust and Safety

▲ Includes front-end JavaScript libraries with known security vulnerabilities — 9 vulnerabilities detected
 User Experience
 ▲ Displays images with inappropriate size
 ▲ Browser errors were logged to the console
 Passed audits (11)

These checks ensure that your page is optimized for search engine results ranking. There are additional factors Lighthouse does not check that may affect your search ranking. <u>Learn more</u>.

Mobile Friendly — Make sure your pages are mobile friendly so users don't have to pinch or zoom in order to read the content pages. <u>Learn more</u>.

▲ Tap targets are not sized appropriately — 35% appropriately sized tap targets

Additional items to manually check (1) — Run these additional validators on your site to check additional SEO best practices.

Not applicable (2)

Progressive Web App

These checks validate the aspects of a Progressive Web App. <u>Learn more</u>.

Fast and reliable

Page load is fast enough on mobile networks	~
Current page does not respond with a 200 when offline	~
start_url does not respond with a 200 when offline No usable web app manifest found on page.	~
Installable	
Uses HTTPS	~
Does not register a service worker that controls page and start_url	~
Web app manifest does not meet the installability requirements Failures: No manifest was fetched.	~
PWA Optimized	
Does not redirect HTTP traffic to HTTPS	~
Is not configured for a custom splash screen Failures: No manifest was fetched.	~
Does not set a theme color for the address bar. Failures: No manifest was fetched, No ` <meta name="theme-color"/> ` tag found.	~
Content is sized correctly for the viewport	~
Has a <meta name="viewport"/> tag with width or initial-scale	~
Contains some content when JavaScript is not available	~
Does not provide a valid apple-touch-icon	~
Manifest doesn't have a maskable icon No manifest was fetched	~
Iditional items to manually check (3) — These checks are required by the baseline PWA Checklist but are not tomatically checked by Lighthouse. They do not affect your score but it's important that you verify them manually.	~
